

# Agricultural Products

## AvalKsan

Approved by Teagasc, AvalKsan is a Liquid caustic / chlorinated detergent steriliser, ideal for all use at all temperatures. Does up to 100 washes per 25Ltr drum. Formulated for milking machines, pipelines, automatic bulk milk tanks and manual cleaning of bulk tanks. Phosphate free.

## Avalchlor

For best results use in conjunction with Jetster to form a combined detergent sterilizer mix thus ensuring the lowest possible TBC results, decomposes microbial growth in the piping network and on the surfaces of milking machines. For most effective results use within 12 months of purchase.

## Aval Descale Extra

An acid solution containing a mix of phosphoric/nitric acid. Dissolves and removes scale from hardwater deposits and milkstone when combined with milk protein. Regular use ensures a high standard of quality milk production and prolongs the life expectancy of the milking equipment.

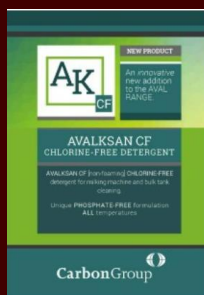

## Jetster

Used cold or hot, Jetster is a caustic based powder detergent. Suitable for use in hard and soft water areas. Reduces milkstone formation when used hot. Approved by Teagasc. Low foaming formulation, high detergency action makes it ideal for all types of milking parlours. Does up to 95 washes per 12kg bucket.

## ThermoKlense

3 in 1 product – Descaler, Sanitiser & Disinfectant. ThermoKlense reduces thermotolerant bacteria, while preventing T.C.M problems. It eliminates the requirement for Chloras in the final rinse and is ideal for milking machines, bulk tanks & cluster dipping.

## AvalKsan Chlorine Free

**New Product**

Chlorine Free Detergent.

For best results, use in conjunction with ThermoKlense

Suitable for milking machines & bulk tank.

Unique phosphate free formulation. All temperatures
